

Petition to support Homeopathy as a self-regulating health profession under the Health Professions Act

Our numbers are small and your support is needed. Public interest in the regulation of homeopathy is vital to the success of our application for self-regulation. The Ministry of Health Services looks at the demand in the province for the services of homeopaths as part of their evaluation of our application. We need to demonstrate that the designation of homeopathy under the Health Professions Act is in the public interest.

What can you do to help?

1. Print out as many copies as you need of the petition that follows. Please do not alter the petition in any way as we are more effective if all petitions sent to the provincial government are the same.
1. Ask your patients and friends of homeopathy to sign the petition. Most people like to voice their opinion and add their signature to support a cause they believe in – we value their support! Only persons who are 19 years or older and residents of BC should sign this petition.
1. Petitions may be distributed to other venues - those who sell homeopathic remedies may want to support our application. Please keep track of the petitions you hand out so that you can collect and return them to us.
1. Petitions may be mailed in when a page is full of signatures or kept to be sent in at a later date. At some point in the application process we will ask for the petitions to be returned so we can submit them to the government.
- 2.
3. Return the signed petition to **BCSH:**
